DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

Claims 1-2, 4, and 6-8 are rejected under 35 U.S.C. 102(e) as being clearly anticipated Prajescu et al. (US 6,739,069).

Claim 9 is rejected under 35 U.S.C. 102(b) as being clearly anticipated Ikeda et al. (US 5,454,171).

Claim Rejections - 35 USC § 103

Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prajescu in view of Sung (US 5,245,764). Prajescu is considered to clearly anticipate the claimed invention, except for the claimed predetermined temperature value and motor stoppage step. First, it would have been an obvious matter of design choice to claim the predetermined temperature value, since that value has not been shown to have any patentable advantage over the temperature values found in the prior art of record. Second, it considered that Sung, another dryer, discloses the claimed motor stoppage step at column 7 line 17. It would have been obvious to one skilled in the art to combine the teachings of Prajescu, with the teachings of a motor stoppage step, considered to be found in Sung for the purpose of allowing forced cool air circulation for drying clothes without the excessive heat that would cause damage to desired laundry cleanings.

Art Unit: 3749

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ikeda. Ikeda is considered to anticipate the claimed invention, except for the claimed predetermined temperature value. It would have been an obvious matter of design choice to claim a predetermined temperature value, since that value has not been shown to have any patentable advantage over the temperature values found in the prior art of record.

Claims 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over lkeda in view Souza (US 5,161,314). Ikeda is considered to disclose each of the claimed elements as rejected above, except for the claimed step of driving an exhaust fan during the cooling procedure. Souza, another laundry dryer, is considered to disclose a step of driving an exhaust fan during the cooling procedure on the face of that reference. It would have been obvious to one skilled in the art to combine the teachings of Ikeda, with the step of driving an exhaust fan during the cooling procedure as disclosed by Souza, for the purpose of cooling laundry within a dryer during a laundering operation to prevent scorching or overheating through a substantial linear decrease in temperature over time

Double Patenting

Claims 1-13 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 6,983,552 in view of claims 1-11 of U.S. Patent No. 6,775,923. Although the conflicting claims are not identical, they are not patentably distinct from each other because assignee's '552 patent, another laundry dryer, claims moisture measurement instead of

Art Unit: 3749

sensing temperature, while assignee's '923 patent claims sensing temperature, as claimed in the present application. It would have been obvious to one skilled in the art to combine the patented moisture measurement with the patented temperature sensing for the purpose of cooling procedure laundry items within a drying environment to prevent damage to the articles to be dried.

Response to Amendments

Applicant's amendments filed in response to a recent application interview have been fully considered but are considered moot in view of a new search necessitated by the changed scope of the claimed invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 571 272 4875. The examiner can normally be reached on normal weekday business hours (east coast time).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ehud Gartenberg can be reached on 571 272 4828. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
